>> Sonya,

>>

>> There is nothing on the website about the 300,000 plus units of contaminated bark that has now been sold and shipped throughout the US. We asked if you would notify the EPA and public-did you? Will you?

>>

>> There is nothing on the website about attorney Allan Payne and his relationship to EPA. Will you clarify?

>>

>> There is nothing on the website about EPA's reversal on severing pathways of exposure in Libby. Will you clarify?

>> What prompted this change in position?

>>

>> There is nothing on the website about the dangerous storage site at OU3 or the

disastrous contamination of Rainey Creek and lack of 310 permit. What is being done to remedy this?

>>

>> There is no answer on the website as to replacing the money wasted thus far on dangerous decisions, and restoring Montana's "silver bullet" due to a complete failure to provide the promised OU4 Risk Assessment. Will you provide a timeline for resolving these items?

>>

>> Please respond to our very specific questions in the interest and protection of human health and safety, as there are no answers on the website to these questions.

>>

>> We look forward to your expeditious response.

>>> We have received many emailed questions and comments from Libby residents regarding EPA,s activities in the town. We carefully consider all of these messages and make changes to our activities as appropriate. In order to more effectively address your questions and concerns and to provide for fuller discussion, we have decided to host an early evening availability session for Libby residents before the TAG meeting each month. We hope to make this session available via conference call for those who are not able to attend the meetings in person. We encourage you to come to the meetings with your questions, and we will endeavor to discuss them with you at that time. The time and location of these meetings will be publicized in the local newspapers. The first meeting will be Tuesday, April 12, 2011, from 5:30-6:30 pm at the Flathead Valley Community College.

>>> The answers for many questions are available on EPA,s Libby web page which is updated regularly. Many site-related documents can also be accessed through the web page. Any requests of documentation not available on the web page should be submitted through EPA,s Freedom of Information Act (FOIA) process. More information about the FOIA process is available at [www.epa.gov/foia/](http://www.epa.gov/foia/).
